SET-UP KAMADO CLASSIC B.

Step 1: Cart Assembly

Flip cart upside down for easy assembly. Assemble cart by inserting two "X" connectors into leg ends, then screw in using the wrench provided. Place lock washer above flat washer over bolt before screwing through leg into "X" connector. Screw in casters and tighten nuts using wrench provided. While assembling, leave screws loose to allow adjustment in cart. Otherwise it can be difficult to get all of the screws in. After cart is assembled, confirm all bolts are tightened, then lift Kamado and set into cart with bottom vent centered between two legs.

Step 3: Grill Assembly

Take all parts out of grill before lifting. The grill is heavy and will require 2 people to lift it into cart and if possible a third person to help guide the kamado into cart. Using the shelf brackets as lift handles, lift grill and set it into cart. Place fire bowl inside the kamado and place cast iron grate into the fire bowl. Place cooking grate onto grill with hinged section facing towards front of grill. Close lid and press top vent onto top of kamado so spring clips are fully engaged, with calibrations facing the front of the grill.

Step 2: Shelf Bracket

Mount shelf brackets over studs on the sides of the metal bands on the bottom ceramic grill body with bracket slots facing up. Brackets are stamped on the back with letters indicating their position (e.g., LF=Left Front bracket and RB=Right Back bracket). Mount flat washer then acorn nut on each stud and tighten with wrench provided.

Step 4: Handle Assembly

Attach the handle by placing handle bracket over studs, opposite the hinge. On each stud use flat washer, then screw on acorn nut and tighten.

Step 5: Long-Term Maintenance

1. The Wood Side Shelves should be covered when not in use and may require refinishing from time to time.
2. Routinely check the Spring Assist Band to make sure the 2 5/8" bolts are tight and secure.
